(a) Pixel error of decoded frames
pixel MSE ([0, 1] RGB)
observed
model step k (5 raw actions each)
imagined (rollout → probe)
encoded real frame → probe
(b) Latent prediction error
squared distance in latent
observed
model step k (5 raw actions each)
imagined vs. encoded real
last observed embedding
(c) Agent position from decoded frames
position error
agent radius
observed
model step k (5 raw actions each)
imagined
agent stops
(d) Door centre from decoded frames
door centre error
agent radius
observed
model step k (5 raw actions each)
imagined
door stops
Lines: median over held-out episodes. Bands: interquartile range.
